## DETAILED ACTION

### *Oath/Declaration*

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required.

See MPEP §§ 602.01 and 602.02. Applicant is reminded of the continuing obligation under 37 CFR 1.178(b), to timely apprise the Office of any prior or concurrent proceeding in which Patent No. 6,733,535 is or was involved. These proceedings would include interferences, reissues, reexaminations, and litigation.

Applicant is further reminded of the continuing obligation under 37 CFR 1.56, to timely apprise the Office of any information which is material to patentability of the claims under consideration in this reissue application.

These obligations rest with each individual associated with the filing and prosecution of this application for reissue. See also MPEP §§ 1404, 1442.01 and 1442.04.

The reissue oath/declaration filed with this application is defective because it fails to contain the right language. In page 2, paragraph number 4, the phrase "is know to be material to the examination of this application" is incorrect and must be as following: "is know to be material to the patentability of this application" statement that all errors which are being corrected in the reissue application up to the time of filing of the oath/declaration arose without any deceptive intention on the part of the applicant. See 37 CFR 1.175 and MPEP § 1414. Finally, the inventor's signature is missing in the declaration.

In accordance with 37 CFR 1.175(b)(1), a supplemental reissue oath/declaration under 37 CFR 1.175(b)(1) must be received before this reissue application can be allowed.

**The Applicants filed, on August 5, 2009, a “to correct errors statement”. However, they did not submit a PTO/SB/51 form (<http://www.uspto.gov/web/forms/sb0051.pdf>) along with a supplemental reissue oath/declaration under 37 CFR 1.175(b)(1).**

***Claims***

2. The amendments failed to comply with 37 CFR 1.173(b)(2) (d) and (g). An amendment of a “new claim” (i.e., a claim not found in the patent, that was previously presented in the reissue application) must be done by presenting the amended “new claim” containing the amendatory material, and completely underlining the claim. The presentation cannot contain any bracketing or other indication of what was in the previous version of the claim. This is because all changes in the reissue are made vis- à-vis the original patent, and not in comparison to the prior amendment. Although the presentation of the amended claim does not contain any indication of what is changed from the previous version of the claim, applicant must point out what is changed in the “Remarks” portion of the amendment. Hence, claims 21 and 22 need to be underlined in their entirety because **they are new claims** with respect to the original patent. Applicant is also required to point out the differences between the new claims and the original claims. **Further, new claims need the status identifier “NEW”.** See MPEP 1453; Section 5, Example D.

3. Claims 1-22 are rejected as being based upon a defective reissue application under 35 U.S.C. 251. See 37 CFR 1.175. The nature of the defect is set forth above.

Receipt of an appropriate supplemental oath/declaration under 37 CFR 1.175(b)(1) will overcome this rejection under 35 U.S.C. 251. An example of acceptable language to be used in the supplemental oath/declaration is as follows:

**“Every error in the patent which was corrected in the present reissue application, and is not covered by a prior oath/declaration submitted in this application, arose without any deceptive intention on the part of the applicant.”** See MPEP § 1414.01.

It is not sufficient to state that the patent did not claim the full scope of the invention since applicant has not pointed out what the other claims lacked that the newly added claim has or vice versa. Applicant needs to point out words or phrases that would be considered an error under the reissue.

4. Claims 4 and 19 have been recently amended. In claim 4, at line 2, “wherein the gasket and [,] the nuclear central portion....” the word --and-- should be underlined (it is an addition). In claim 19, the limitation “further comprising a plurality of said integral disc units” has been completely deleted (rather than placed in brackets).

### *Conclusion*

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 3774

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
